

# **Deng Photovoltaic Panel Installation Company**

## Overview

---

These are the simplest of solar-electric systems, with the fewest components (basically the PV array and the load). Because they don't have.

Although they are most common in remote locations without utility service, off-grid solar-electric systems can work anywhere. These systems operate independently from the grid to provide all of a household's electricity.

This type of system works as a grid connected system combined with an off grid system. It works by feeding the load (consumption) first and the.

These PV systems are also known as on-grid, grid-tied, utility-interactive, grid-intertied, or grid-direct. They generate solar electricity and route it to the loads and to the electric utility.
