

# Development trend of photovoltaic bracket

## Overview

---

How big is the solar photovoltaic (PV) market?

The market is expected to grow from USD 399.44 billion in 2024 to USD 2,517.99 billion by 2032 at a CAGR of 25.88% over the forecast period (2024-2032). Asia Pacific dominated the solar photovoltaic (PV) market with a market share of 49.16% in 2023. Solar energy is used to convert sunlight into electricity by using photovoltaic effect technology.

Why is the solar photovoltaic market growing?

The government in many countries has imposed stringent carbon emission norms due to which the focus towards the renewable sector is increasing, particularly towards solar photovoltaic generation. This is expected to push this market towards growth during the forecast period. Request a Free sample to learn more about this report.

Which country dominated the solar photovoltaic (PV) market in 2023?

Asia Pacific dominated the solar photovoltaic (PV) market with a market share of 49.16% in 2023. Solar energy is used to convert sunlight into electricity by using photovoltaic effect technology. These PV systems are the most reliable and widely available source of renewable energy.

What is the global solar photovoltaic (PV) market share?

Geographically, the global solar photovoltaic (PV) market share is divided into North America, Europe, Asia Pacific, the Middle East & Africa, and Latin America. The Asia Pacific region held the major share of the global market. More than 77 GW of solar capacity will be added in the region in 2020.

What percentage of the solar PV market is based on thin-film technology?

Currently, thin-film technology accounts for only 5% of the global solar PV market, while silicon-based solar modules still hold approximately 95% of the global PV module market (GlobalData, 2018).

How has the growth in PV markets impacted the power industry?

The exponential growth seen in PV markets has led to the development of large-scale power plants, which has increased demands for better tools for inspection and monitoring.
