

# Diablo energy storage project

## Overview

---

Pittsburg is the future home of Diablo Energy Storage, a 200-megawatt lithium-ion battery energy storage facility being constructed by LS Power, which, upon completion, will reliably and economically receive, store, and discharge electricity, including energy produced by renewable resources. Who owns the Diablo energy storage project?

LS Power Development is the owner. LS Power Development is the developer. The Diablo Energy Storage Project is comprised of three separate 15-year agreements totaling 150 MW. The three projects will be stand-alone lithium ion battery energy storage resources located in Contra Costa County.

What is LS Power-Diablo battery energy storage system expansion projects?

The LS Power-Diablo Battery Energy Storage System Expansion Projects is a 150,000kW energy storage project located in Contra Costa County, California, US. The market for battery energy storage is estimated to grow to \$10.84bn in 2026.

What is the largest battery energy storage project in the world?

SAN DIEGO, August 19, 2020 - LS Power today unveiled the largest battery energy storage project in the world - Gateway Energy Storage. The 250 megawatt (MW) Gateway project, located in the East Otay Mesa community in San Diego County, California, enhances grid reliability and reduces customer energy costs.

Which energy storage facilities are in the pipeline?

The company currently has in its pipeline the 200 MW Diablo Energy Storage facility in Pittsburg, California, the 125 MW LeConte Energy Storage facility in Calexico, California, and the massive 316 MW Ravenswood energy storage project under development in Queens, New York.

What's going on with Vistra Energy's 'Moss Landing' energy storage system?

Last week, Vistra Energy secured a permit to expand an energy storage system under construction at its natural gas-fired Moss Landing generation station in Monterey County, California, to 1,500 MW/6,000 MWh approved. It will soon become the largest battery installation in the world, by far.

Is this a breakthrough period for large-scale energy storage?

This year has proven to be a breakthrough period for large-scale energy storage. Last week, Vistra Energy secured a permit to expand an energy storage system under construction at its natural gas-fired Moss Landing generation station in Monterey County, California, to 1,500 MW/6,000 MWh approved.
