

# **Dimensions of the generator hood**

## Overview

---

How do I size a generator?

When sizing a generator it is important to take into consideration the running loads and the starting currents. For example, the running current of a 3 phase 10 HP induction motor will be approximately 13 Amps, however the starting current will be between 3 and 9 times the running current i.e. 39 to 117 Amps.

Where can I find generator dimensions?

Dimensions are listed on the spec sheets for each generator model. Spec sheets can be found by using [Generac.com](http://Generac.com) . Was this article helpful?

Generator dimensions are listed on each generator's spec sheet.

How much does a generator enclosure weigh?

ACCESS: In case of emergency, the enclosure allows you to quickly and easily access your generator. You will know exactly where it is and how to get to it. Ships in two boxes-A box weighs 45.4 lbs and B box weighs 40.1 lbs.The unit frees up your outdoor storage shed or garage.

How do you calculate fuel pressure for a generator?

Required fuel pressure to generator fuel inlet at all load ranges - 3.5-7 in water column (0.87-1.74 kPa) for NG, 10-12 in water column (2.49-2.99 kPa) for LP gas. For BTU content, multiply ft<sup>3</sup>/hr x 2500 (LP) or ft<sup>3</sup>/hr x 1000 (NG). For Megajoule content, multiply m<sup>3</sup>/hr x 93.15 (LP) or m<sup>3</sup>/hr x 37.26 (NG).  
Controls.

How much power do I need for a generator?

So the required current can be as high as 50 Amps - much larger than your standard 13 Amps plug sockets at home. We would suggest 6.0 mm 2 twin and earth cable, however you may only require 2.5 mm 2 depending upon the

generator requirements. As with the signal cable it is good practice but not essential to use armoured cabling.

What is a whole house generator?

A whole house generator is a portable or permanently placed generator that supplies power to your home. While you can use them at any time, they usually activate when the power goes out due to a storm. These generators come in various sizes to power up small electronics such as cell phones up to larger generators that can power your whole house.
