

Disney solar power farm

Overview

A 270-acre, 50-megawatt solar facility at Walt Disney World is now online, generating enough energy to power 10,000 homes annually. Located west of the Magnolia and Palm golf courses, the facility consists of 518,000 solar panels. It's a big step up from Disney's first 22-acre, Mickey Mouse-shaped solar farm near Epcot. What is Disney's largest solar farm?

The new facility is Disney's largest solar endeavor to date and is expected to generate enough energy to power two of the four theme parks at Walt Disney World. The 50 megawatt solar farm features 500,000 panels, which "is equal to about removing 10,000 cars from the road," said Renner.

What percentage of Walt Disney World's Power is solar?

At its max performance, solar energy will be responsible for 25 percent of Walt Disney World's power needs. The new facility is Disney's largest solar endeavor to date and is expected to generate enough energy to power two of the four theme parks at Walt Disney World.

Could a visionary Walt Disney have imagined solar power?

Walt Disney World Even the visionary Walt Disney probably could not have imagined this one. The Walt Disney Company is just months away from generating enough renewable solar energy to fully power two of its four parks at the Walt Disney World Resort in central Florida.

Does Disney have a solar plant?

Disney unveiled its Mickey Mouse-shaped solar facility in 2016. This is the second solar plant at Walt Disney World — the company announced a 22-acre Mickey Mouse-shaped facility in 2016 near EPCOT. These facilities are all part of Disney's goal to reduce net greenhouse gas emissions by 50% by 2020.

How much solar energy does Disney World need?

At its max performance, solar energy will be responsible for 25 percent of Walt

Disney World's power needs. The two new solar arrays will be capable of producing more than 375,000 megawatt hours of energy in its first year, which is the equivalent of removing 29,500 vehicles from the road annually.

When will solar power be available at Disney World?

Both are expected to come online by early 2023. By placing the solar facilities elsewhere in Florida, the Walt Disney World Resort will not need to rely on sunny skies in one area for reliable solar energy. The addition will also make Disney World the largest commercial consumer of solar in the state of Florida.
