

Do i need to use the solar companies roofer

Overview

Can I install a new roof if I have solar panels?

Though you can install a new roof while panels are installed, the process of installing a new roof on a roof that already has solar panels is straightforward: Contact the roofing company. It'll assess the solar panel installation, do a roof inspection, and provide options for what type of roofing will work with your specific solar panel system.

Should you get a free roof replacement with solar panels?

It's important to address the notion of free roof replacement with solar panels. A small number of companies may advertise free or no-cost roof replacements with solar panels thanks to partnerships with roofing companies. However, it's important to do your research when considering any such offer.

Do you need a roof inspection before installing solar panels?

Before installing solar panels, it's worth it to get your roof inspected unless it's new. While metal roofs and tile roofs can last over 50 years, asphalt roofs usually only last up to 30 years. So even if your asphalt roof is just 5-10 years old, you'll still want to make sure it will last as long as your solar panels.

Should I replace my roof and get solar panels at the same time?

Replacing your roof and getting solar panels at the same time can even provide some benefits. When you install solar panels and a new roof at the same time, it's very unlikely you'll need to re-roof during your system's lifetime. Solar panels are more durable than most roofing materials and can extend the life of the roof shingles they cover.

Do solar panels need to be removed before roof repairs?

Additionally, as with any secondary installation over the roof, any repairs the roof might need in the future may require solar contractors to come and remove the panels before roofing contractors can perform roof repairs. This

means coordinating and paying two separate contracting companies.

Can solar panels be installed over a degraded roof?

Installing panels over an aging or degraded roof could accelerate existing roof problems. Additionally, as with any secondary installation over the roof, any repairs the roof might need in the future may require solar contractors to come and remove the panels before roofing contractors can perform roof repairs.
