

# Do solar installation companies required a contractor s license

## Overview

---

A contractor must possess the general license that is appropriate to the type of solar device being installed. Installers of a solar water heater or a photovoltaic device shall possess an appropriate contractor's license. A contractor must qualify as a solar contractor to install, alter or repair a solar device. Do Solar Contractors need a license?

The solar contractor industry is regulated by state and local authorities, each with unique licensing laws and application requirements. Many states require solar businesses to obtain a state contractor license. Depending on the state this could be a specific license for solar contracting or residential/home improvement.

Do solar installers need a license in Nevada?

Nevada law requires that solar energy system installers be licensed by the Nevada State Contractors Board. Contractors may be licensed under License Classification C-37 (solar contracting), or perform solar work under License Classification C-1 (plumbing and heating) for solar thermal installations. Licensing (PV).

Do you need a license to sell solar panels?

Some states require businesses to obtain specific licenses to sell solar panels. If you solicit, sell, negotiate, or execute home improvement contracts for a licensed contractor, you may need to register with the Contractors State License Board (CSLB). What other licensing and registration requirements impact solar contractors?

.

When did solar contractor licensing start?

Solar contractor licensing commenced in the 1980s alongside the introduction of incentive programs for solar water heating. State regulation and licensing of solar contractors continues to evolve as the industry grows. Currently, 12

states and Puerto Rico have solar contractor licensing requirements.
