The Boeing Starliner (or CST-100) is a spacecraft designed to transport crew to and from the (ISS) and other low-Earth-orbit destinations. Developed by under 's (CCP), it consists of a crew and an expendable . Slightly larger than the or , but s.

What is a space capsule?

A space capsule is a spacecraft designed to transport cargo, scientific experiments, and/or astronauts to and from space.

What is a capsule based spacecraft?

Capsule-based crewed spacecraft such as Soyuz or Orion are often supported by a service or adapter module, and sometimes augmented with an extra module for extended space operations. Capsules make up the majority of crewed spacecraft designs, although one crewed spaceplane, the Space Shuttle, has flown in orbit.

What are some examples of crewed space capsules?

Current examples of crewed space capsules include Soyuz, Shenzhou, and Dragon 2. Examples of new crew capsules currently in development include NASA's Orion, Boeing's Starliner, Russia's Orel, India's Gaganyaan, and China's Mengzhou.

How are capsules different from other spacecraft?

Capsules are distinguished from other spacecraft by the ability to survive reentry and return a payload to the Earth's surface from orbit or sub-orbit, and are distinguished from other types of recoverable spacecraft by their blunt shape, not having wings and often containing little fuel other than what is necessary for a safe return.

Will Boeing Refly crew capsule without astronauts?

"After problem-plagued test flight, Boeing will refly crew capsule without astronauts". Spaceflight Now. Archived from the original on May 25, 2020. Retrieved August 29, 2020. ^ Malik, Tariq (November 11, 2020). "NASA says Boeing's next Starliner test flight won't launch until 2021". Space.com. Archived from the original on November 13, 2020.

How does a space capsule work?

Rotational thrusters were used to steer the capsule under either automatic or manual control by changing the lift vector. At lower altitudes and speeds parachutes are used to slow the capsule down by making more drag. Capsules also have to be able to withstand the impact when they reach the Earth's surface.
