

Ducati lithium battery charger

Overview

Where can I buy a battery charger for my Ducati?

Available in-store now at your local Ducati Dealership. RRP \$105 USD (part no: 69929011AZ) The all-new Ducati Battery Charger by TecMate, for use with models using Lithium-Ion batteries, is a premium Italian styled device designed to increase the life of your battery and ensure your Ducati is always ready to start at any time.

What is the new Ducati tecmate battery charger?

The new exclusive design by Ducati turns this new battery charger into an Italian-style Premium product. Construction relies on cutting-edge technology and quality, and manufacturing is care of a top-class supplier like tecMATE. This device was designed to increase the useful life of lead-acid batteries.

Which batteries are not compatible with the Ducati lithium Charger?

Not suitable for: Non-rechargeable NICD, NIMH, LI-ON batteries. The Ducati Lithium Charger is designed for new models using Lithium-Ion batteries, guarantees your Ducati's electrical system is consistently optimized for every ride.

How does the Ducati battery charger work?

Thanks to Ducati Battery Charger you can ensure that your Ducati will be ready to start at any time, even after a long period of inactivity. The battery charger operates according to a fully automatic microprocessor-controlled algorithm. Once battery is fully charged, voltage decreases to maintenance level.

What happens when a Ducati battery is fully charged?

Once the battery is fully charged, it switches to maintenance mode and if electronic accessories cause a voltage drop, the charger automatically returns to charging mode. Suitable for all Ducati models, connect directly to the DDA

(Ducati Data Acquisition) socket for new models or use the cable with eyelets for models without DDA socket.

How to charge a Ducati scooter?

1. Switch off the scooter and open the kickstand. 2. Turn the Ducati logo, open the waterproof cover, then connect the charger to the charging port. Battery charging CAUTION Charge the device before the first use. We also recommend charging it after each use and before storing it.

[Help with battery chargers , Ducati.ms](#)

I'm 99.9% sure that the stock battery does have a BMS. First of all, pretty much all lithium batteries made and sold in the last few years do, unless you specifically look for one without. Second, it's an OEM part and Ducati would be extremely silly to risk installing a battery without this safety feature, in a bike covered by warranty etc.
