[2] [3] As an integrated operator, the Group develops and finances the construction of renewable energy facilities, and manages operations and maintenance for its own account and for third parties.

Notre mission

EDF Renewables est un acteur majeur des énergies renouvelables. Filiale du groupe EDF, nous accompagnons la transition énergétique dans plus de 20 pays dans le monde. Le groupe EDF Premier producteur d'électricité décarbonée au monde, c'est-à-dire sans émissions directes de CO2, le groupe EDF est présent de la production à la fourniture d'électricité, en passant [...]

Wind Energy Solutions , Clean Wind Energy from EDF Renewables

Onshore Wind energy solutions from EDF Renewables , Renewable wind & solar energy that's clean, with no air pollution & doesn't deplete natural resources Continuous growth across North America U.S. wind power has more than tripled over the past decade, and today is the largest source of renewable energy in the country, providing 10.2% of U.S. electricity.

Nos expertises

Because our responsibility does not stop at the production of low-carbon electricity, we also have expertise in the dismantling of our projects but also in their renewal. The renewal or "repowering » corresponds to the dismantling of a wind farm reaching the end of its cycle in order to replace all the wind turbines with the latest

generation machines, more reliable and more robust.

Un groupe international

Located in Abu Dhabi, the Al Dhafra Solar Power Plant is the largest solar power plant in the world. Developed by EDF Renewables and its partners including Jinko Power, it will be able to provide the equivalent of the electricity ...
