

Edf renewables logo

Overview

EDF Renewables (formerly EDF Renouvelables) is a wholly owned subsidiary of the utility, specializing in production. As an integrated operator, the Group develops and finances the construction of renewable energy facilities, and manages operations and maintenance for its own account and for third parties.

What is EDF renewables?

Now they'll be known as EDF Renewables. That's the new name for EDF Group's solar and wind activities in more than 20 non-French speaking countries around the world. EDF Renewables in the UK has 34 wind farms, including 2 offshore wind farms and also a battery storage unit.

What is EDF EN UK?

UK renewable energy developer EDF Energy Renewables and operations and maintenance business EDF ENS UK are coming together under a new brand. Now they'll be known as EDF Renewables. That's the new name for EDF Group's solar and wind activities in more than 20 non-French speaking countries around the world.

What motivates EDF renewables?

Tackling climate change is what motivates us to create projects that serve our community. In England, Ireland, Scotland and Wales, EDF Renewables is a major renewable energy company, specialising in wind power, solar power, battery storage and EV power infrastructure technology.

What is EDF renewables UK & Ireland?

EDF Renewables UK and Ireland is a joint venture between EDF Renewables (EDF's global renewable business, operating in over 20 countries worldwide) and EDF UK. At EDF Renewables, we're always glad to hear from talented people who want to help us to build a low carbon energy system for the UK and Ireland.

Can EDF renewables drive innovation?

EDF Renewables has already demonstrated its ability to drive innovation, for example in the Blyth Offshore Demonstrator Project, where float and submerge technology was used in the installation of gravity base foundations, 66 kV cables and 8.3 MW turbines – all firsts in offshore wind.

What happened to EDF renewables North America?

In September 2023, it was announced EDF Renewables North America had sold its 200MW Millers Branch Solar Facility in Haskell County, Texas to the Southern Company subsidiary, Southern Power for an undisclosed amount. [23]
