What is electric power steering (EPS)?

Electric Power Steering (EPS) offers improved handling and steering feel while improving vehicle safety by adopting the steering torque to the vehicle speed and providing active torque in critical driving situations.

What is electric power steering?

Electric power steering uses an electric motor to assist steering a vehicle when the driver turns the steering wheel which is a replacement of the traditional mechanical and hydraulic system. The benefits of an EPS system are less CO2 emissions, higher fuel efficiency, quicker operation, and enhanced user experience.

What are the components of electric power steering system?

The main components of the electric power steering system (see Figure 2) are as follows, Reduction gear box. Motor The motor employed for Electric Power Steering (EPS) system gear assembly is a permanent magnetic field DC motor. This motor generates steering assisting force required to turn the wheels.

What causes a loss of power steering assist in EPS electric power steering?

A loss of power steering assist in EPS electric power steering can be caused by a faulty power steering pump, a broken drive belt, a malfunctioning electric power steering motor, or a problem with the electric power steering control module. Why is the steering wheel stiff or hard to turn in EPS electric power steering?

.

What is electro hydraulic power steering (EHPS)?

Electro Hydraulic Power Steering (EHPS) is an advanced system that uses conventional hydraulic power steering with an electric motor-driven hydraulic

pump. steering gearbox without a module applies assistive power driving conditions. With electronic systems becoming they will use. Unlike its conventional.

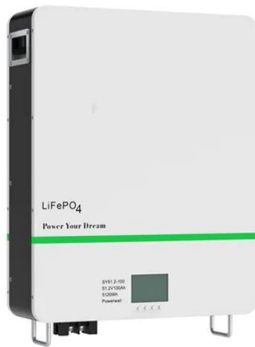

What is a power steering ECU?

Power Steering ECU: The power steering electronic control unit (ECU) is responsible for controlling the overall operation of the EPS system. It receives input from the various sensors and control unit and sends signals to the electric power steering motor to provide the appropriate level of assistance.
