## Overview

---

What is EPs?

EPs is a company that pioneers electric aviation with certifiable power systems. Join their team to shape the future of aviation. Passionate and dedicated individuals are welcome.

Who is EPS power engineering?

AWHILE. Gary R. Olsen, Central Valley's premium Power Engineer started the operations of EPS 48+ years ago with the central objective to provide safe and reliable designs that are easy to operate and maintain. We have accumulated a wealth of power systems engineering knowledge over the years and have left our mark in major construction.

What is the electric power system (EPS)?

The "Electric Power System" (EPS) is designed to capture, store and distribute power to other FloripaSat-1 modules. The power capture system is based on the conversion of solar energy through six panels located on each face of the satellite structure. The captured energy is stored in two series-connected lithium batteries.

What makes EPs a reliable electrical service provider?

EPS is committed to quality and reliable service. As accredited NETA members, our technicians undergo required testing to demonstrate their knowledge in several categories, including safety and independent electrical testing methods.

Who is electric power systems?

At Electric Power Systems, we specialize in electrical acceptance testing, commissioning, and maintenance testing for a wide range of clients including Utility, Generation, Renewables, Industrial, Transit, Data Centers, and Commercial Facilities throughout North America.

What makes EPs a great company?

Committed to excellence in electrical acceptance testing, commissioning, and maintenance testing. Proud to be the nation's largest independent provider of substation services. Energy Business Review interview with Ryan Cross, EPS's Vice President of Engineering.
