

# Element solar energy

## Overview

---

Who is element solar?

Element Solar is a Utah-based solar provider that designs and installs residential-grade, commercial-grade, and utility-grade solar panel systems. Founded in 2020, the company also installs high-quality backup battery solutions including the Storz Power system and the Tesla Powerwall.

What services does element solar provide?

Element Solar provides assistance at every step of the installation process: Energy Savings Report — The solar provider will calculate the projected savings of switching from traditional electricity to solar power.

Does element solar offer a backup battery?

In addition to solar energy systems, Element Solar also provides backup battery solutions from Storz Power and Tesla. These solar batteries allow homeowners to store excess energy their systems produce and use it during the night or in the event of a power outage or other emergency.

Does element solar provide residential solar installation services in Utah?

Element Solar only provides residential solar installation services to homeowners in Utah. If you live in Utah, we encourage you to read the latest verified Element Solar reviews to see how the company compares to other leading solar providers in their neighborhood.

Why should you choose elemental energy?

Elemental Energy has been recognized as one of the nation's top residential solar installers for five years in a row. Solar is also one of the best financial investments you can make. Our team can design a storage system that meets your energy needs. We do more than just solar! Worldwide, 1.3 billion people are without access to electricity.

Where is element solar located?

Element Solar is in Utah! We live in Florida! Stephen keeps apologizing for the delay but explains he can't make the company provide the help we need. Donna - thanks so much for reaching out to us. We have technicians in Florida who will be coming out to check your system.
