

Emergency power generator for home

Overview

What type of generator do I Need?

A standby generator, like the Generac Guardian 24kW Home Generator, is the most common option for whole-home generators since it offers average power outputs ranging from 10,000 to 24,000 watts. This generator type is permanently installed outside the home and is connected to a propane fuel tank or natural gas line.

Can a generator power a whole house?

Large whole-house generators can power an entire average home, while smaller units provide power for key appliances. These are the best standby models from CR's tests.

What is a whole house generator?

A whole house generator, also known as a standby generator, is a device that provides backup electrical power to an entire house in the event of a power outage. It operates automatically and is designed to restore power quickly and seamlessly, allowing you to maintain essential functions and appliances in your home even when the grid power is down.

Which home generator should I buy?

We researched the options and spoke with several experts to select the best home generators you can buy, including our best overall choice, the Briggs and Stratton PowerProtect 26kW Home Standby Generator, chosen for its versatility, power, and reliability.

What is a standby generator?

Standby generators are permanently installed and connected to a home. These may power select critical circuits during a power outage, or may provide power for the whole home. Standby generators have systems that monitor power supplied by a utility and start automatically in the event of an

outage.

Do I need a home generator?

The home generator you need depends on a variety of factors, including the type and wattage of the appliances you want to power. For example, if you want to power small appliances, such as a coffee maker or television, we recommend investing in a portable power station.
