

# Energy storage box installation location diagram

## Overview

---

How do I install xstorage battery packs?

Eaton's certified partner who has completed xStorage Compact ESS service training. You can install the xStorage battery packs only within the Eaton xStorage battery rack and connect them with the Eaton xStorage energy storage systems. Install the rack only on a non-flammable floor. Gen1 batteries).

Where is the control panel located in the xstorage compact system?

Compact unit, and the means to manage application-specific functions of the larger energy storage system. As default, the control panel is placed on the front door of the system cabinet. As an option, the xStorage Compact system is also available without the control panel.

Where should a battery enclosure be located?

Batteries should not be installed directly above or within 200 mm of any battery system. The enclosure should not be located in direct sunlight and should be in a location that keeps the battery system as cool as possible. Adequate ventilation should be available to assist in temperature control and if.

Do Encharge storage systems provide backup power?

Encharge storage systems are capable of providing backup power when an Enphase Enpower™ smart switch is installed at the site. For installing Encharge with 3rd party PV inverter please refer to the planning guide document on Enphase Energy Storage System for third party PV inverters online on Enphase website.

What is an Encharge storage system?

The Encharge storage system senses when it is optimal to charge or discharge the battery so that energy is stored when it is abundant and used when scarce. Encharge storage systems are capable of providing backup power

when an Enphase Enpower™ smart switch is installed at the site.

How many batteries can be installed in the Eaton xstorage compact?

Battery pack One battery string (1 master battery pack and 4 battery packs) is installed in the Eaton xStorage Compact 20 kW - 40 kW unit. Up to 2 battery strings (1 master battery pack and 4 or 9 battery packs) can be installed in the external battery rack for more energy capacity.
