

Energy storage cabinet installation and placement bracket

HEAT DISSIPATION

Cold aisle containment,
making optimal refrigeration effect;

Overview

Do encharge storage systems provide backup power?

Encharge storage systems are capable of providing backup power when an Enphase Enpower™ smart switch is installed at the site. For installing Encharge with 3rd party PV inverter please refer to the planning guide document on Enphase Energy Storage System for third party PV invert-ers online on Enphase website.

Where should the encharge battery(ies) be placed?

During use, storage, transport, or installation, always keep the Encharge Battery(ies) in an upright position. **WARNING:** You must install the Encharge Battery(ies) only on a suitable wall using an Enphase wall-mount bracket.

How do you attach a battery to a wall mounting bracket?

) Once all four battery bolts fully pass through the mounting bracket key hole slots, lower the battery down until fully seated within the wall-mount bracket and set into the bottoms of the key holes.) Attach the battery to the mounting bracket aligning the screw hole at the bottom of the battery with the screw hole at the bottom of the bracket.

What is an encharge storage system?

The Encharge storage system senses when it is optimal to charge or discharge the battery so that energy is stored when it is abundant and used when scarce. Encharge storage systems are capable of providing backup power when an Enphase Enpower™ smart switch is installed at the site.

How do you install a battery holder?

Transport the battery to the installation location. Lift the battery to the height of the mounting bracket. Hang the battery on the mounting bracket, while holding it by the handles. Secure with a mounting bracket screw (supplied) on each side. Apply a torque of 42 in-lbs/4.7N*m. Mount the conduit holder.

How do I install a wall-mount bracket?

Follow the instruction below for the bracket you are installing.) Place the wall-mount bracket on the wall so that the mounting holes in the middle of the bracket align with the center of the stud.) Use a level to keep the bottom of the wall-mount bracket level.
