LIQUID COOLING ENERGY STORAGE SYSTEM

EMS real-time monitoring
No container design
flexible site layout

Cycle Life
≥8000

Nominal Energy
200kwh

IP Grade
IP55

Overview

Why is energy storage a problem in the EU?

Energy storage suffers from lack of regulatory certainty within the EU. While a number of member states – Germany and the UK especially – have made great strides in adoption levels, lack of consistency is a looming issue.

Will the UK reduce energy storage capacity by 2021?

In the UK, the All-Party Parliamentary Group (APPG) on Energy Storage claim that current government policy will reduce the storage capacity deployed by 2021 from a potential 12 GW to 8 GW. The European Association for Storage of Energy (EASE) have also stated that regulations must keep up with advances for the technology to flourish.

Do you need to store solar power?

When power is drawn from the electrical grid at a flat rate, there is no need to store that solar power. Storing excessive thermal energy to be used in colder times is one of the oldest forms of energy storage known to us. Recent research and development have made it possible to use this energy for grid applications.

Should energy storage be regulated?

The European Association for Storage of Energy (EASE) have also stated that regulations must keep up with advances for the technology to flourish. The benefits of energy storage for both end users and the grid have already reached a tipping point where costs are justified for many business cases – this trend shows no sign of stopping.

What is thermal energy storage?

Storing excessive thermal energy to be used in colder times is one of the oldest forms of energy storage known to us. Recent research and development have made it possible to use this energy for grid applications.

Learn more about the different types of thermal energy storage [here](#).

Are regulatory barriers hindering energy storage projects?

Regulatory barriers are also identified as a hindrance to further energy storage projects by many in the field. In the UK, the All-Party Parliamentary Group (APPG) on Energy Storage claim that current government policy will reduce the storage capacity deployed by 2021 from a potential 12 GW to 8 GW.

Energy storage world forum sydney

energy storage Archives - Energy Storage World Forum

The company focuses on stationary Energy Storage across all applications from Residential, Self - Consumption and Microgrid through to large scale stationary storage. We are Europe's first conference dedicated solely to energy storage since 2010. All of our
