

Ento energy

Overview

What is ENTO & how does it work?

The product utilises data that's already on Ento and creates a tailored plan to reach long-term energy and carbon emission goals. The strategy is fully customisable by the energy team to fit their building portfolio while ensuring compliance with the latest regulations and most ambitious sustainability standards.

How many followers does ENTO have?

Ento | 2,724 followers on LinkedIn. The easiest way to optimise energy consumption in public and commercial buildings | We help organisations increase energy efficiency and intelligent energy consumption to reduce emissions and support the sustainable energy transition with scalable, artificial intelligence software.

Why did I join ENTO?

One of the reasons that convinced me to join Ento in the first place was the possibility to access vast amounts of building energy consumption data and create measurable impact. Over the past year, I've had the exciting opportunity to be working on a cutting-edge tool for measuring and verifying energy efficiency savings in buildings.

Who is ENTO?

Ento, a Humanforce company | 2,684 followers on LinkedIn. Ento was founded in Australia in 2009 to help businesses manage rostering, leave, attendance and communication within their workforce.

What is ENTO industries?

This Company's principal activity is manufacture of prepared animal feeds (including additives for animal feed) with wholesale trade of a variety of goods without a dominant product as the secondary activity. ENTO INDUSTRIES PTE.

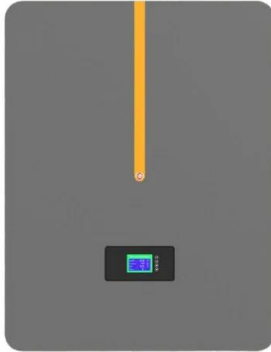

LTD. was incorporated on 10 June 2020 (Wednesday) as a Private Company Limited by Shares in Singapore.

What is the meaning of ENTO?

The letter 'EN' in the surname Orgen does not directly correspond to the meaning 'Piece whose exterior profiles are crowded in shape, so that these of a profile correspond to the empty spaces of the other' or 'Said of the crooked partition in the form of different enamel clavks'. These definitions do not answer the question regarding the meaning of the surname Orgen.

Ottimizzazione energetica - Supporta l'analisi del portafoglio di Ento con dati orari e approfondimenti storici. Reporting - Consente la creazione di report mensili e giornalieri controllo - Funzioni di controllo limitate, principalmente incentrate sulla fornitura di dati sul consumo piuttosto che sul controllo attivo.

Équilibrer la sécurité des patients et l'efficacité énergétique

Découvrez comment Regionshospitalet Randers optimise son efficacité énergétique sans compromettre la sécurité des patients. En s'appuyant sur la plateforme pilotée par l'IA d'Ento, l'hôpital a réalisé d'importantes économies d'énergie tout en maintenant des opérations critiques 24 heures sur 24 et 7 jours sur 7.

Ento

Integrating comprehensive electricity data is essential for Danish businesses looking to optimize energy usage through Ento AI's platform. With multiple data integration options--spanning public data hubs, utility distributors, submeters, and proprietary protocols--our solutions allow you to seamlessly connect to a broad range of data sources and BMS systems.

Holstebro Municipality: Energy savings with AI-based system

The Danish Municipality of Holstebro started using Ento's AI-based Energy Advisor in August 2021 and has already achieved significant savings. This reduction in energy consumption could only happen by replacing their old "data collecting" system with something more modern focused on actionable insights.
