

# **Equipping farmers houses with photovoltaic panels**

## Overview

---

Why do farmers need solar panels?

Farm buildings can provide large, uncomplicated roof spaces which are ideal for installing solar PV, helping farmers to reduce their energy bills significantly. Mypower specialise in installing high quality, high yielding solar panels for agricultural buildings. Agricultural solar system - High energy users.

Are solar panels a viable option for farm buildings?

Solar panels for farm buildings High and volatile electricity costs are adding to the escalating overheads faced by UK farmers which affect profitability. Farm buildings can provide large, uncomplicated roof spaces which are ideal for installing solar PV, helping farmers to reduce their energy bills significantly.

Should you install solar panels on your farm?

By installing solar panels on your farm, you're essentially turning sunlight into a source of clean, sustainable, and cost-effective energy. Discover our solar PV solutions exclusively designed for agricultural buildings and farms of all types and sizes, whether you need ground-mounted panels or roof installations.

Why should a farm use solar PV?

Our Solar PV systems empower your farm with renewable energy, reducing your environmental footprint while providing economic benefits. Whether you're a small farm, a large agricultural enterprise, or anywhere in between, our tailored solutions fit your unique needs.

What is a solar roof & solar farm?

panels deployed across large fields, as solar farms. Over the past decade, Britain has seen around 14 gigawatts, of power from solar PV. About 70% of this is in the agricultural sector. Solar roofs and solar farms are becoming a

familiar part of the 21st-century British landscape in both urban and rural areas.

Is solar photovoltaic a good investment for farmers?

This site is protected by reCAPTCHA and the Google Privacy Policy and Terms of Service apply. Even without renewable energy incentives, solar photovoltaic (PV) power generation can offer a sound return on investment for farmers, following the dramatic fall in its capital cost.
