

Escom enhanced solutions

Overview

Who is Escom enhanced solutions?

ESCOM Enhanced Solutions specializes in self-powered, wireless sensing systems for harsh environments.

What does Escom do?

In 18 months, ESCOM has deployed new distribution network planning and maintenance systems, commercial management solutions, measures, energy settlements and risk auditing. NH transforms the purchasing process of the entire hotel chain that was fragmented by the autonomy of each hotel.

How much energy does Escom generate?

The overall rate of electrification is estimated at 7 percent. Hydropower generation is the largest source of energy. ESCOM's total installed capacity is estimated at 304 MW. Of this, approximately 285MW (94 percent) is generated by hydropower and the remaining 19MW (6 percent) is thermal.

What is Escom limited?

The mandate of the Corporation is to procure, operate, transmit, distribute and supply electricity in the country. ESCOM Limited is constituted by licensees namely Single Buyer, Transmission, Distribution and System and Market Operator.
