

# Expected ROI of large scale battery storage project in Chile 2025

## Overview

---

How many energy storage projects are in Chile?

According to a December 2023 publication on the InvestChile website, the country had 23 approved energy storage projects with a total of 3,000 MW of capacity. Chile is exploring a variety of solutions to keep abreast of the changing energy demand landscape ranging from BESS to innovative projects using CO<sub>2</sub>.

Which companies are building large-scale battery energy storage projects in Chile?

Enel is building a 67 MW/134 MWh battery, while CJR Renewable and Uriel Renovables are planning 200 MW/800 MWh and 90 MW/200 MWh projects, respectively. From pv magazine EES News site three different developers announced separate large-scale battery energy storage (BESS) projects collocated with solar farms in Chile.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

How much does a battery cost in Chile?

In fact, batteries charged at nearly \$0/MWh during the day in the sunny, northern desert regions of Chile, sell energy at night for over \$100/MWh. Although projects such as Engie's BESS Coya are already enjoying these large spreads, this capacity payment will partially de-risk Chile's dependence on volatile, but still profitable, merchant revenues.

How much battery storage does Chile have?

Chile has an operational installed capacity of approximately 1GW in batteries,

and another 3GW is under construction. Battery storage has been largely financed by bank lending in recent years, but we believe larger projects could increase the scope for bond financing.

Which energy storage projects are co-located with solar plants in Chile?

Three utility scale battery energy storage projects co-located with solar plants were announced last week in Chile. Enel is building a 67 MW/134 MWh battery, while CJR Renewable and Uriel Renovables are planning 200 MW/800 MWh and 90 MW/200 MWh projects, respectively. From pv magazine EES News site

## Expected ROI of large scale battery storage project in Chile 2025

### Chile To Deploy 5 GW Of Battery Storage Capacity By 2030 To ...

Storage facilities will also create attractive opportunities for energy arbitrage, with average returns projected at around US\$79/MWh until 2030. However, as battery capacity ...

### Chile to become second-largest battery market in ...

These projects primarily focus on large-scale front-of-meter integration of renewable energy, with lithium-ion battery storage serving as the dominant technology.

### [Battery Energy Storage Roadmap](#)

This EPRI Battery Energy Storage Roadmap charts a path for advancing deployment of safe, reliable, affordable, and clean battery energy storage systems (BESS) that also cultivate equity, innovation, and workforce ...

### Battery returns vary throughout Chile, solar colocation ...

According to a recent analysis from Aurora Energy Research, however, there are stark discrepancies in battery returns throughout the country. In northern regions, battery storage projects remain consistently profitable ...

### Saudi Arabia commissions its largest battery energy storage system

Saudi Arabia has officially connected its largest battery energy storage system (BESS) to the grid, marking a significant milestone in the country's renewable energy ...

### Cost Projections for Utility-Scale Battery Storage: 2023 ...

Executive Summary In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration ...

### 1.2GWh! Latin America's Largest Solar-Plus-Storage Project to ...

United States: New large-scale energy storage project installations will continue to experience high growth in 2025; this is mainly due to the large scale of project reserves. ...

### CVC DIF to acquire a large scale hybrid solar PV and battery storage

CVC DIF has agreed to acquire a utility-scale hybrid PV-BESS energy project in Chile from Grenergy. The project is currently under construction in Northern Chile and ...

### Understanding the Return of Investment (ROI): battery energy storage ...

Several key factors influence the ROI of a BESS. In order to assess the ROI of a battery energy storage system, we need to understand that there are two types of factors to keep in mind: ...

### CVC DIF to Acquire Gabriela Hybrid Solar-Battery ...

5 ???· The Gabriela project forms the fourth phase of Grenergy's Oasis de Atacama initiative, a large-scale hybrid solar and storage complex being developed in Chile's Atacama Desert. Once completed, Oasis de Atacama is ...

### U.S. battery storage capacity will increase significantly ...

The remarkable growth in U.S. battery storage capacity is outpacing even the early growth of the country's utility-scale solar capacity. U.S. solar capacity began expanding in 2010 and grew from less than 1.0 GW in ...

### Solar, battery storage to lead new U.S. generating capacity ...

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator ...

### Grenergy expands storage system agreement with ...

Spanish renewable energy company Grenergy has renewed its agreement with BYD to supply large-scale storage systems for the Oasis de Atacama solar-battery hybrid project in Chile. The extension brings the total ...

### Chile inaugurates its largest standalone battery ...

Chile Energy Minister Diego Pardow was present at the inauguration of the 200 MW/800 MWh BESS del Desierto, a project its developers describe as the first large-scale standalone energy storage plant in Latin ...

### Wisconsin's first large-scale battery storage system ...

The state's first large utility-scale battery storage project came online in southeastern Wisconsin this month, providing enough storage to power more than 130,000 homes for four hours.

### Utility-Scale Battery Storage in the U.S.: Market Outlook, Drivers, ...

Utility-Scale Battery Storage in the U.S.: Market Outlook, Drivers, and Opportunities in 2025 and Beyond Introduction As the U.S. accelerates its transition toward a ...

### Chile inaugurates largest standalone battery energy ...

Chilean Energy Minister Diego Pardow was present at the inauguration of the 200 MW/800 MWh BESS del Desierto, a project its developers describe as the first large-scale standalone energy storage

### Australia: The 2025 NEM Battery Energy Storage Pipeline Report

Australia has a massive pipeline of grid-scale battery energy storage projects. 16.5 GW of new battery projects could arrive in the NEM in the next 3 years.

### Energy Storage in 2025: What's Hot and What's Next?

The energy storage landscape is changing quickly as scientists work to create better and longer-lasting storage solutions. Experts are focused on improving smart grids to ensure that electricity systems work well and are.

## Top Battery Storage Companies to Watch in 2025

NextEra Energy is actively pursuing large-scale battery energy storage projects, including a 400 megawatt-hour system in collaboration with Platte River Power Authority in Colorado, expected to be operational by late ...

## Chilean Battery Energy Storage Systems Stabilize Energy ...

We expect energy storage projects to benefit from stacking, or diversifying, their sources of revenue. Many projects will derive 40%-50% of their revenue from relatively stable ...

## CAISO: The state of grid-scale battery energy storage ...

Another 5.6 GW is set to come online in 2025, driven by large-scale hybrid projects. Subscribers to Modo Energy's Research will also find out: How SP15 dominates CAISO's battery buildout and why its solar resources drive price ...

## Saudi Arabia commissions its largest battery energy ...

Saudi Arabia has officially connected its largest battery energy storage system (BESS) to the grid, marking a significant milestone in the country's renewable energy expansion. The project

## Energy storage safety and growth outlook in 2025

A notable trend in battery energy storage systems (BESS) is the integration of early thermal runaway detection and containment mechanisms, which are crucial for preventing and mitigating safety incidents associated with ...

## Chile Energy Storage Industry Holds Promise , EMIS

The project is Atlas Renewable Energy's first foray into battery storage technology, which the company sees as essential for increasing the share of renewable energy ...

## 600 MWh of BYD batteries arrive for Chile's Oasis de ...

The shipment is part of a strategic agreement signed in January 2024 with Chinese battery maker BYD for the supply of 1.1 GWh of large-scale energy storage products in the form of 2,136 Blade modules of its MC ...

## Aurora finds regional variation in battery returns throughout Chile

A recent analysis by Aurora Energy Research, a global power market analytics provider, examines the economic drivers of battery storage in Chile, including optimal duration, cycling, ...

## Unlocking the Potential of Grid-Scale Battery Storage Business

Despite the growing attention to grid-scale battery storage, large-scale deployment began globally in the late 2010s and in Japan around 2023. As such, the sector is still in its early stages of ...

## Global Energy Storage to Hit 94 GW in 2025, Says BNEF

Utility-scale projects are driving capacity gains in Saudi Arabia, South Africa, Australia, the Netherlands, Chile, Canada and the UK. In the Europe-Middle East-Africa region, ...
