

# Farm solar power generation subsidy policy

## Overview

---

Can I apply for a solar Grant and a farm productivity grant?

It is possible to apply for both a solar grant and a farm productivity grant, but separate applications must be submitted, and the maximum grant across both applications is £500,000. Applications should be made through the Rural Payments Agency (RPA). The IFP grant is competitive, with applications judged on how well they meet funding criteria.

What is the improving farm productivity solar grant?

The Improving Farm Productivity solar grant is designed to support the installation of solar equipment on farm roofs and reservoirs. It is part of Defra's drive to improve energy resilience and encourage electrification in agriculture.

How much does the IFP solar grant cover?

The Improving Farm Productivity (IFP) solar grant covers 25% of the capital cost for a wide range of equipment, including: Installation of charging points. PV panels can only be installed on farm building rooftops or irrigation reservoirs; ground-mounted systems are not eligible. How much funding is available?

Grants range from £15,000 to £100,000.

How much is a grant for solar equipment?

For solar equipment, the minimum grant available is £15,000 and the maximum grant available is £100,000. The grant will cover up to 25% of the cost. You can apply for both automated and robotic equipment and solar equipment, however your maximum grant amount still cannot exceed £500,000 in total for both applications together.

Can a contractor apply for a solar PV grant?

Contractors are defined as a business (including a sole trader) that carries out an agricultural or horticultural activity as a service. Contractors are not eligible to apply for solar PV grant funding. The grant funded assets must be located in England. The grant must not be used to subsidise any related business or operations in Northern Ireland.

How much money can I apply for a solar PV grant?

If your application is for robotic or automatic equipment, wavelength specific LED lighting and/or advanced ventilation control units, but does not include solar PV equipment, the minimum grant you can apply for is £25,000 (50% of £50,000). The maximum grant is £500,000 per applicant business.

## Farm solar power generation subsidy policy

### Uttar Pradesh Solar Energy Policy -2022 (Draft)

6 14. "Government" and "State" mean Government of Uttar Pradesh and the State of Uttar Pradesh respectively; 15. "Gross Metering" means methodology under which the entire ...

### Solar Panel Subsidy in Uttar Pradesh, 2024: Rs. 7,800/kW
