

Fire blanket lithium battery

Overview

What is a lithium fire blanket?

A lithium fire blanket is the simplest, safest, and most effective way to isolate lithium battery fires- such as in e-scooters, e-bikes, and open battery fires. Lithium battery fires don't respond to traditional fire extinguishers, which makes even small lithium battery fires extremely dangerous.

What should I do with my lithium-ion battery fire blanket?

After use, it is your responsibility to dispose of the lithium fire blanket responsibly and replace it. The Vigil 3m x 2m lithium-ion battery fire blanket is the ideal size for small to medium portable devices powered by a lithium battery.

What are firechief® lithium-ion battery fire blankets made of?

A: All Firechief® Lithium-ion battery fire blankets are made from coated fibreglass, which is designed to withstand temperatures in excess of 1000°C. The material has been tested to Standard EN13501 through KIWA. Q: What standard is the Firechief® Lithium-ion battery fire blanket accredited to?

.

How does a lithium-ion battery fire blanket work?

Lithium-ion battery fire blankets work in the same way as normal fire blankets; containing and controlling the fire by smothering it. However, the Lithium-ion battery blanket is made from a specialist material to withstand the extreme temperatures and neutralise the gases released. Q: Where can the Lithium-ion Battery fire blanket be used?

.

How long does a lithium ion battery fire blanket last?

A: Lithium-ion battery fire blankets should be kept in a dry, ventilated place. If kept in the recommended environment the Firechief® blanket will be usable for a minimum of 5 years. Q: How do you dispose of a Lithium-ion battery fire blanket?

.

Do you need a Bridgehill lithium fire blanket?

Lithium batteries inside broken equipment have a greater chance of catching fire. A Bridgehill Lithium Fire Blanket should be available at all recycling stations that handle broken and used lithium batteries. All lithium battery manufacturers should have Bridgehill Lithium Fire Blankets readily available throughout the building.

Fire blanket lithium battery

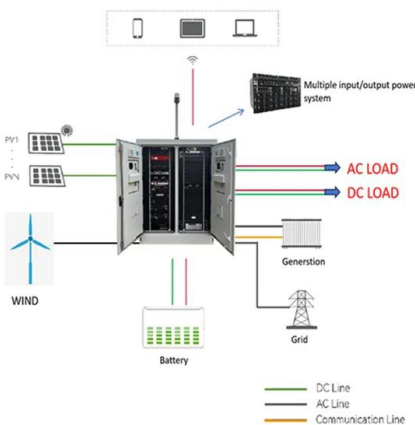

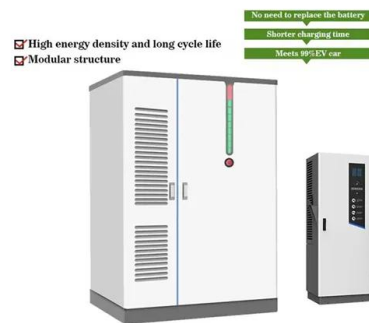

Safety Guide: Preventing and Managing Lithium Battery Fires

A fire blanket can help control a lithium battery fire by smothering the flames and cutting off the oxygen supply. However, for complete extinguishment, it's recommended to use a fire extinguisher specifically designed for lithium fires.

Vigil 3m x 2m Lithium Battery Fire Blanket

The Vigil 3m x 2m lithium-ion battery fire blanket is the ideal size for small to medium portable devices powered by a lithium battery. It is suitable for anything up to the size of an electric scooter and can also cover power tools, vapes, toys, laptops, mobile phones, small drones, hoverboards, and solar panel storage batteries.
