

# Flat-panel photovoltaic bracket installation

## Overview

---

How to install solar panels on a flat roof?

Solar panels that are mounted onto flat roofs need to be installed at a pitch that captures as much sunlight as possible, as well as keeping the panel clean. By mounting the panels at an angle of at least 10 degrees, self-cleaning is possible. Thankfully, self-standing solar panels are usually fitted at 20 and 50-degree angles.

What angle should solar panels be installed on a flat roof?

The ideal pitch for a Solar Panel is around 30 degrees off the horizontal. Simply because this allows the panels to gain more exposure from the sun throughout the entire day. When installing Solar panels on a flat roof, this is easily achieved. As the Solar Panels are installed onto a bracket which tilts the panel to around 30 degrees.

Can a flat roof solar system be installed on a domestic property?

Whilst flat roof solar systems are more commonly used on commercial buildings, they can certainly be fitted onto domestic properties too. Read on to find out more about flat roof solar, and how in many cases it is actually better than normal on-roof solar! [How do Solar Panel Systems on a Flat Roof Work?](#)

.

Can solar panels be mounted on a roof?

Naked have seen it all before and can help you find the perfect Solar mounting system to get your solar panels where you want them. We've all seen Solar PV panels mounted on people's roofs and on the roofs of businesses, so here's a rundown of the options to get them up there. By far the most common method for fixing Solar PV panels to a roof.

What is a flat roof photovoltaic mounting system?

The flat roof photovoltaic mounting system is attached to the roof without penetration of the waterproofing system or roof deck. The systems are designed to be used in conjunction with our Single Ply or Reinforced Bitumen Membrane waterproofing solutions and are lightweight at 9-12.5 kg/m<sup>2</sup>, depending on the module selected.

Which solar mounting frame is best for a flat roof?

In most situations, a free-standing ballasted flat roof solar mounting frame is preferable. Using a free-standing mounting system weighed down with ballast, avoids the need to penetrate the roof surface.
