Can solar panels be installed on a flat roof?

Flat roof solar panel mounting systems require a specific approach. To install solar PV on south facing flat roof we would use a ballasted system. This means the roof is not penetrated (which would let in water on a flat roof), and the system is unable to be lifted or tipped over by the wind.

Can solar panels be mounted on a roof?

Naked have seen it all before and can help you find the perfect Solar mounting system to get your solar panels where you want them. We've all seen Solar PV panels mounted on people's roofs and on the roofs of businesses, so here's a rundown of the options to get them up there. By far the most common method for fixing Solar PV panels to a roof.

Should a solar PV array be installed on a new flat roof?

Any solar designer or specifier should give the same focus to ensuring the rooftop array is installed with methods that have as little impact as possible on the building and its waterproofing and that the array works to its maximum potential for its entire lifespan. There are numerous reasons for including a solar PV array on a new flat roof.

How do you install solar panels on a roof?

They drill through the slate into the rafter using two fixing holes, sealant is applied to the fixing holes and the base of the limpet. The solar limpet is then screwed onto the roof. Rails are then run across the roof and bolted to the limpets, and the solar panels are fixed to these rails (adjustable bracket).

How do you install solar PV on a slate roof?

See a case study of a tiled roof here To install solar PV on a slate roof, our installers would use solar limpets. They drill through the slate into the rafter using two fixing holes, sealant is applied to the fixing holes and the base of

the limpet. The solar limpet is then screwed onto the roof.

Why should you choose a solar mounting system for a flat roof?

After all, the roof has lots of usable space and is often large enough for an extra profit-making function. The solar mounting systems for flat roofs from Van der Valk Solar Systems have been developed with all due attention for roof and wind load, so they comply with the highest safety standards.
