

Flex-force power system

Overview

What is the Flex Force power system®?

Simple. Stunning. Striping. The Flex-Force Power System® is the one electric cordless system you need to command a full line of unbeatable battery operated lawn equipment from handhelds like trimmers and blowers all the way up to the biggest, baddest, most powerful walk power mowers, zero turn mowers and snow blowers in our battery-powered lineup.

What is Flex Force?

It's called Flex-Force for a reason. It's all about flexible power. Commanding a full line of cordless lawn tools that is a force to be reckoned with. It's the one system you need to finish everything without sacrificing anything.

What is a Flex Force powerhead?

High/low speed selector. Quick-feed line. Plus multi-tool versatility with a Flex-Force powerhead that's interchangeable with every attachment capable tool in the lineup. The Flex-Force Power System® is Toro's most advanced line of battery-powered, cordless yard equipment and tools for ultimate flexibility and performance.

What is the most powerful flex-force battery?

The Toro 60V* Flex-Force Power System® is the most powerful battery in its class. Period. It's the one battery you need to finish everything without sacrificing anything. It offers the ultimate innovation with our "3P" configured stack for 3 times the power, higher max performance, and the ability to push your tools harder, for longer.

How many tools can a Flex Force power system handle?

With an interchangeable battery capable of commanding over 75 lawn tools, it's the one system you need to finish everything without sacrificing anything. The Flex-Force Power System feature brushless motors, delivering higher max

performance so you get to push your tools, harder, for longer. Easy. Fast. Quiet. No engine exhaust. No hassles.

What is the Toro 60V Flex Force power system?

As part of the Toro 60V Flex-Force Power System®, it's got power like no other that commands a full line of tools. Go from tool to tool to tool, done and done and done. *Battery manufacturer rating = 60V maximum & 54V typical usage. Actual voltage varies with load. **Up to 565 CFM Max and 110 mph Max on turbo boost.
