

Florida and solar energy

Overview

Solar power in Florida has been increasing, as the cost of solar power systems using photovoltaics (PV) has decreased in recent years. Florida has low electricity costs compared with other states, which makes individual solar investment less attractive. Florida ranks ninth nationally in solar resource strength according to.

In 2006, the State of Florida enacted the Florida Renewable Energy Technologies and Energy Efficiency Act, which provided consumers with rebates.

Developers in Florida have announced the addition of solar panels on all new homes in several subdivisions. In 2013, it was discovered.

Potential generation Solar energy is the state's most abundant energy resource and estimates have placed the state's potential at 2,902 , which would produce.

• • • • .

In 2009, Florida Power & Light built the state's first solar power plant, the . At the time, the 25-MW plant was the largest of its kind. In.
