

Fronius solar system

Fronius solar system

Fronius Solar.web

The system information is received via the data communication unit integrated into the inverter, which transmits all necessary data to Fronius Solar.web via LAN or WLAN connection. The data communication function is integrated as standard in the SnapINverter and GEN24 Plus series, but can be easily retrofitted in all other models.

Solar monitoring

How PV system monitoring works with Fronius Solar.web. You can register easily and free of charge at with your inverter serial number.. Your Fronius inverter monitors the entire photovoltaic system and transmits the status live on Solar.web.. You can access the information via your PC/laptop or on your mobile phone or tablet.
