

Generator air inlet and exhaust silencer

Overview

What is a diesel generator exhaust silencer?

A diesel generator exhaust silencer is a device for reducing diesel engine noise emission. It is inevitable that all internal combustion engines produce noise, more or less. The noise level will largely vary depending on diesel engine type.

What is a generator silencer?

This type of generator silencer is commonly used for low to mid-level noise reduction. The internal construction consists of fiberglass or E glass insulation. The exhaust noise is reduced as it flows through the insulation.

How does a generator silencer reduce exhaust noise?

The exhaust noise is reduced as it flows through the insulation. This type of generator silencer has a greater sound attenuation rating and is typically used to reduce high frequency sound waves. As the name implies, this type of silencer combines the construction of the reactive and absorptive silencers.

What is a discharge silencer on a generator?

Vibro-Acoustics' discharge silencers reduce noise transmission through the air exhaust openings of the generator. There are many options to save space and minimize pressure drop. Transitional silencers and full-height baffles are two examples. No two generator applications are the same.

Do generator exhaust silencers have a sound rating?

Typically, noise ratings increase along with the power and size of the generator. For generators, a silencer does the same job that a muffler handles for engines in automotive and construction applications. Diesel generator exhaust silencers also come with a sound rating and they are divided into various grades.

Do gensets include a silencer?

Generator sets that are packaged in an enclosure would include a silencer of sorts. Use the following info to learn about the different types of generator silencers available today and whether adding a silencer to your genset is worthwhile.

Generator air inlet and exhaust silencer

- LiFePO₄
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount&wall mount
- Intelligent BMS
- Cycle Life:≥6000
- Warranty :10 years
