[Renewables cover 57% of Germany's electricity](#)

Renewable power sources covered around 57 percent of Germany's gross electricity consumption in the first half of 2024, preliminary figures published by the Federal Environment Agency have shown. Generation from renewable sources reached 147 terawatt hours (TWh), rising by nine percent compared to the same period of the previous year.

EU surpasses 50% renewable power share for first time in first half of 2024

Eurelectric corrects figures: Power demand in the EU decreased by 5.1% in the first half of 2023, compared to 2022, and was 4.8% lower in the first half of 2024, compared to 2022. Electricity industry association Eurelectric has released figures showing that 50 percent of public electricity generation in the EU came from renewables for the first time in the first half of ...

Germany's Sustainable Development Strategy , Federal ...

Germany is on the right track: we now generate about 43 percent of our electricity from renewable energy sources, which significantly reduces greenhouse gas emissions. Looking forward

Germany's 2022 renewables and efficiency reforms

2022 is the year of energy reform in Germany, the federal coalition government of Social Democrats (), Green Party and Liberal Democrats pledged when it took over in late 2021 s aim was to accelerate renewables growth, the hydrogen ramp-up, the decarbonisation of the heating and transport systems and power grid expansion.

German Net Power Generation in First Half of 2024: Record ...

At 140 terawatt hours, more renewable electricity was generated in Germany in the first half of 2024 than ever before, accounting for 65% of net public electricity generation. Generation from fossil fuels continues to decline as do the electricity prices on the

Germany

Germany's Climate Law sets out the framework for reaching net zero emissions by 2045. In order to achieve the ambitious Energiewende by 2030, 80% of all electricity supply will need to come from renewable energy sources (and 100% by 2035) and coal is to be completely phased out.

ESS

Almost 60 percent of Germany's public electricity supply

Nearly 60 percent of all electricity fed into the German grid in the first three months of 2024 came from renewable energy sources, shows data published by the country's ...

Germany's Renewables Energy Act - Policies

Germany's renewable energy levy, the surcharge in consumers' electricity bills that goes to support renewables, will be EUR 0.065 (USD 0.077) per kWh next year, reduced from EUR 0.06756 in 2020. Average households will see power prices fall by 1%.
