

# **Ghost movie production solar power generation version**

## Overview

---

Are diesel generators overpowering film sets?

This 'overpowering' of film sets has been the status quo for decades. " Diesel generators have made us pretty lazy with our math - we basically just add up the lights we have and supply enough power to turn them all on at once, all day long, with lots left over for heating up all the snacks" - Kerri Coombs, Vancouver Gaffer.

How much power does a film production need?

Powering a film production is an expensive business. Your typical power set-up is a centralized grid, involving at least one or two 400A diesel generators. That number can rapidly rise to 20 on large, high-draw productions. This 'overpowering' of film sets has been the status quo for decades.

Was 'inception' a big-budget movie filmed with solar power?

Inception thrilled audiences all around the world, but amid all the talking points, one central element was largely left out. The movie was the first-ever big-budget movie shot with solar power. If we had been nearly as concerned about renewable energy in 2010 as we are in 2022, this would probably have been the most important talking point of all.

Did Leonardo DiCaprio make a movie with solar power?

You'll be asked to sign into your Forbes account. A decade ago, Leonardo DiCaprio starred in the Academy Award-winning movie Inception. Inception thrilled audiences all around the world, but amid all the talking points, one central element was largely left out. The movie was the first-ever big-budget movie shot with solar power.

Did Jason Bateman use solar power in 'Bad Words'?

Since filming Inception in 2010, several production companies have experimented with powering aspects of their production with solar power.

However, in 2013, Actor Jason Bateman went a step further when he allegedly relied entirely on solar power when he directed and produced the film *Bad Words*.

Are big studios installing solar roofs?

Certain big studios seem to have gotten the memo, as studios are increasingly installing solar roofs to offset their energy consumption. For the last decade, Warner Bros. Studios has maintained a 600-kilowatt solar roof that generates about 1.15 million kilowatts of renewable energy annually.

## Ghost movie production solar power generation version
