Overview

The global PV inverter market size was estimated at USD 13.09 billion in 2023 and is expected to expand at a compound annual growth rate (CAGR) of 18.3% from 2024 to 2030. The growing awareness regarding environmental issues and need to reduce carbon emissions is driving demand for clean energy solutions, which.

Based on product, the string PV inverter segment emerged as the leading segment with the maximum revenue share of 47.10% in 2023. These inverters are highly reliable with timely maintenance and flexible enough to be.

The Asia Pacific region dominated the market with the largest market share of 44.09% in 2023. China is the largest contributor to the rapid.

Based on end-use, the market is categorized into commercial, residential & industrial, and utilities segments. The utilities segment emerged as leading segment and accounted.

Concerns regarding excessive carbon emissions owing to usage of conventional fuels for transportation and power generation purposes have prompted countries globally to opt for cleaner and more efficient sources of.
