

Government procurement price of BESS in Spain

Overview

Search all the latest and upcoming battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Spain with our comprehensive online database.

Search all the latest and upcoming battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Spain with our comprehensive online database.

How do you determine the price of the Global Project Tracker subscription?

The cost of Global Project Tracker subscription varies based on factors like the number of users, regions, sectors, project development stages, and additional features or services included in the package.\n\nContact our.

Subscribe to get Spain government tenders, Bids, RFPs and eProcurement notices from the biggest online database of Spain. SpainTenders is the most authentic and comprehensive database of Spain Tenders, RFPs, Bids and eProcurement Notices. The information on eTenders, EOI, GPN and other public and.

Clean Horizon's latest Spanish price forecast report for Semester 1, 2025, released in March, delivers essential updates reflecting the evolving energy market landscape and its implications for Battery Energy Storage Systems (BESS) in Spain. Thanks to advances in technology, BESS systems now offer.

The market energy storage in Spain, particularly in relation to the BESS systems (Battery Energy Storage Systems), is undergoing a dynamic and accelerated evolution. This transformation is driven by the growing need to integrate renewable energy sources into the electricity grid, improve supply.

In this report, we delve into the developments in the regulatory framework of the Spanish electricity system and explore the potential of Spain's battery energy storage systems (BESS) market. The significant increase in both wind and solar generation capacity is creating the need for storage.

The procurement of government contracts in Spain is regulated by the following legislation: Royal Decree 3/2020 of 4 February, on urgent measures to transpose into Spanish law several European Union directives in the areas of public procurement in certain sectors – private insurance, pension plans. How many Bess projects are there in Spain?

In March 2025, UK companies Renewco and Atlantica announced the development of up to 2.2GW of BESS projects across Spain. Other projects in the pipeline primarily involve storage co-located with solar or wind generation. According to BloombergNEF, the total capacity currently in the BESS pipeline is around 3GW.

Why does Spain need a Bess system?

Spain's commitment to renewable energy integration is a primary driver for the growing demand for BESS. The push towards renewable sources, particularly solar and wind, necessitates efficient storage solutions to manage the variability and ensure grid reliability.

Does Spain need a Bess energy system?

Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country. As a result, the need for BESS to integrate renewable energy sources into the electricity system is less immediate than in the UK, for example.

What is the current situation of the Spanish Bess market?

The current situation of the Spanish BESS market confirms that both of these factors are required to gain market attraction: Despite a high penetration of renewable energy, the Spanish regulatory framework has been lagging and the first BESS projects of significant size have yet to be built.

How many public procurement claims are there in Spain in 2024?

Hence, in the case of the Central Spanish Public Procurement Court, there was a total of 1,654 public procurement claims in 2024. In the case of the Andalucía Public Procurement Court, there was a total of 670; and, in Madrid, there was a total of 489. There are no costs involved in challenging an awarding authority's decision.

What is the legislative framework governing Bess in Spain?

In Spain, the legislative framework governing BESS is evolving to support the growth of renewable energy sources, enhance grid stability, and meet EU decarbonization targets. This article delves into the current state of legislation surrounding BESS in Spain, highlighting key regulations, challenges, and future prospects.
