

# Government procurement price of microgrid storage in South Africa

LFP 48V 100Ah

## Overview

---

In South Africa, microgrid trends are rapidly gaining momentum as a promising solution to address energy challenges and enhance resilience in the face of frequent load shedding events.

In South Africa, microgrid trends are rapidly gaining momentum as a promising solution to address energy challenges and enhance resilience in the face of frequent load shedding events.

The microgrid showcases strong financial performance with an Internal Rate of Return (IRR) of 23.1%, competitive Blended Cost of Energy (BCoE) at \$0.073/kWh, Levelized Cost of Energy (LCoE) at \$0.186/kWh lower than Eskom grid tariffs, and a rapid payback time of 5.5 years. The proposed microgrid.

The Minister of Electricity and Energy, Hon. Dr. Kgosientsho Ramokgopa, announced the appointment of 8 (eight) Preferred Bidders under the Renewable Energy Independent Power Producer Procurement Programme (REIPPPP) Bid Window 7, with a combined Contracted Capacity of 1760 MW, and a further 8.

18 NOVEMBER 2024 The Minister of Electricity and Energy, Hon. Dr. Kgosientsho Ramokgopa, is pleased to announce the successful signing of Projects Agreements and Commercial Close of an additional two Projects appointed as Preferred Bidders under the first Battery Energy Storage Independent Power.

They may procure, buy, sell and generate electricity. Key aspects are summarised and compared to Eskom acting as the single off-taker as it is the case in REIPPPP). It is noted that at the date of issuing this Circular, procurement under Scenario 1 requires capacity to be mobilised within the DMRE. Scenario 1 is.

The government of South Africa has secured nearly 1.7GW/11GWh of grid-scale BESS capacity via various procurement programmes, though questions have been raised around their integrity and deliverability. In an effort to increase penetration of renewable energy and reduce regular blackouts, the.

South Africa is aiming to procure utility-scale battery storage with two tender programmes: its Battery Storage IPP Procurement Programme as well as hybrid battery storage and variable renewables projects through its Risk Mitigation IPP Procurement Programme. These tender programmes are designed to.
