

Grid solutions

Overview

Who is GE Grid solutions?

Grid Solutions, a GE Renewable Energy business, part of GE Vernova, serves customers globally with over 12,000 employees. Grid Solutions provides power utilities and industries worldwide with equipment, systems and services to bring power reliably and efficiently from the point of generation to end power consumers.

What is grid solutions?

Grid Solutions, a GE Vernova business, is focused on bringing together technologies and expertise to help solve the toughest power system challenges, accelerating the global transition to a more resilient and reliable grid. The future of energy is here. The energy industry is facing a pivotal moment and we have a key role to play.

What is grid automation?

Grid Automation products and solutions play a key role in grid modernization, renewable integration and industry electrification. For more than a century, Aix-les-Bains was recognized as one of the largest manufacturing sites in Europe. Today, it's home to GE Vernova's Grid Solutions' Technical Institute - a gas-insulated substa.

What is GridOS software?

GridOS is the first software portfolio for grid orchestration. Learn how it can help utilities. Speak with a utility software expert about how GridOS can enable your digital utility journey. Orchestrate the sustainable energy grid across transmission, distribution, and the edge with GE Vernova's GridOS software portfolio.

What is GE vernova's GridOS orchestration software?

That's where GE Vernova's GridOS Orchestration Software can help. Its

modern architecture brings together energy data, network modeling, and AI-driven analytics across the grid to power a suite of composable applications from GE Vernova, utilities, and partners.

What is GridOS Data Fabric?

Energy data is bigger, faster, and more scattered than ever before. Cut through those challenges and orchestrate the grid with GridOS Data Fabric - the first grid-specific data fabric. Secure. Sustainable. Balanced. The grid has reached an inflection point. Renewables and DERs have hit record levels and keep increasing.
