

# Guascor energy

## Overview

---

Who is Guascor energy?

Guascor Energy is a global leading manufacturer & services provider of gas and diesel engines designed for power generation, cogeneration, waste conversion and marine use. For more than 50 years, the company has been supporting customers in the process of decarbonisation and decentralization of energy & power.

Why should you choose Guascor energy?

With a superb fuel flexibility and also with fuel blending availability, Guascor Energy products represent a cost-efficient choice in both implementation and service. Guascor Energy offers a complete range of propulsion, generation and auxiliary engines powered by diesel or by gas, to meet the demand of any type of professional marine application:.

What is a Guascor energy gas engine?

This means lower costs for you and more sustainable emissions for the environment. Guascor Energy gas engines are designed to operate on a wide variety of fuels including natural gas, renewable biogas, propane, synthetic gas, and mixed gases.

Are Guascor energy engines reliable?

The excellent quality, efficiency and reliability of Guascor Energy engines have been verified in marine and industrial applications for more than 50 years and more than 3.000 actively running engines & gen-sets worldwide by the end of 2022.

Can Guascor energy engines run with pyrolysis gas?

Due to the great fuel flexibility, Guascor Energy Engines are available for running with different gases such as syngas, pyrolysis gas or gas produced by biomethanization processes.

What types of engines does Guascor offer?

Guascor offers a complete range of propulsion and auxiliary engines powered by diesel combined with reduction gearboxes to meet the demand of any type of boat: fishing vessels, tug boats, bulk carriers, trawlers, workboats or dredges. Marine engines are also available for on board auxiliary purposes and power generation.
