Should I buy a DIY solar panel kit?

To save cash, you may be tempted to buy a DIY solar panel kit and fit your panels by yourself. DIY solar panels are widely available and many are excellent value compared with the cost of professional installation. For example, a full 3.4kW 10-panel kit from Plug-in Solar costs £4,728.

Can you make solar panels at home?

Making them at home is something easy to take on your wallet. Building solar panel systems will also be great for educational purposes, the total concept finally revealed here. Get the solar cells arranged on a wooden board, get them wired together, and frame-up, and you are done. Full tutorial here [greenoptimistic 2. How to Build a Solar Panel](#).

Can You DIY a solar panel?

If you're feeling really ambitious, you can go full-on DIY—using copper sheets, you can create your own PV cells. But the cells you make in your kitchen won't last nearly as long or produce nearly as much power as even the cheapest manufactured cells, so if your goal is power over DIY cred you should just buy your cells. Tabbing wire.

Are DIY solar panels legal in the UK?

Yes. UK law is pretty relaxed about DIY solar panels, and in most cases you don't even need planning permission to install a full-sized array of solar panels by yourself. But going DIY may mean you miss out on government schemes,

product warranties and utility company support, because you won't have the necessary paperwork or certification.
