

# Harley lithium battery dead

## Overview

---

Could a lithium motorcycle battery solve your dead-battery Blues?

A lithium motorcycle battery could be the solution to your dead-battery blues. Using the latest chemistry and technology, a lithium motorcycle battery can offer significantly more cold cranking amps and longer life than standard lead-acid or absorbed glass mat (AGM) lead acid motorcycle batteries.

Can a lithium battery be used on a Harley Davidson motorcycle?

A lithium battery can hold the same power as an AGM battery in a significantly lighter and smaller package. Lithium motorcycle batteries can also be placed in any orientation, which makes them popular with custom builders seeking a creative solution to battery placement. Learn more about Harley-Davidson® AGM motorcycle batteries.

What is a Harley-Davidson lithium life battery?

Harley-Davidson Lithium LiFE batteries are engineered to be a direct, drop-in replacement for an Original Equipment AGM battery. Installation does not require foam spacer blocks or any special electrical connection. Harley-Davidson Lithium LiFE batteries weigh up to 70 percent less than a comparable AGM battery.

How long does a Harley Davidson battery last?

Compare that to a lead-acid battery, which can lose about 1 percent of its charge in a day. When disconnected from the motorcycle a Harley-Davidson Lithium LiFe battery will maintain its charge without maintenance for up to 12 months, a bonus for off-season or long-term storage in places where power for a battery tender is not available.

What size battery does a Harley Davidson use?

Harley-Davidson Lithium LiFE batteries are available in 8Ah, 7Ah and 4Ah sizes to fit many Harley-Davidson® motorcycle models. Each is designed to be a

drop-in replacement for the Original Equipment AGM battery. How is a Lithium Battery Different from Other Motorcycle Batteries?

Are lithium motorcycle batteries a good choice?

Using the latest chemistry and technology, a lithium motorcycle battery can offer significantly more cold cranking amps and longer life than standard lead-acid or absorbed glass mat (AGM) lead acid motorcycle batteries. However, a lithium battery is not the right choice for every motorcycle. Here are the facts on these high-tech batteries.
