

Has solar power generation paid off

Overview

How do solar panels earn money?

A large portion of potential solar panel earnings comes from the government's generation tariff, which is part of the Feed-In Tariff (FIT) scheme. Under the generation part of this scheme, you receive a fixed rate of income for each kWh of electricity you generate.

Do solar panels save money on energy bills?

Energy bill savings are a key part of any potential solar PV earnings, as they are guaranteed for the life of your system. A large portion of potential solar panel earnings comes from the government's generation tariff, which is part of the Feed-In Tariff (FIT) scheme.

Can solar panels be sold back to the National Grid?

Customers looking to install solar panels on their home can sell excess electricity back to the National Grid. The current scheme for exporting electricity is called the Smart Export Guarantee (SEG) which replaced the feed-in tariff (FIT) scheme in 2020.

Can solar panels be profitable?

Installing solar panels and signing up to an SEG tariff is unlikely to be anywhere near as profitable as FIT rates were just a few years ago for two reasons: All energy suppliers with more than 150,000 customers are required to offer a Smart Export Guarantee tariff and a couple have voluntarily decided to offer them.

Do solar panels generate electricity?

That said, the rate at which solar panels generate electricity varies depending on the amount of direct sunlight and the quality, size, number and location of panels in use. Even in winter, solar panel technology is still effective; at one point in February 2022, solar was providing more than 20% of the UK's

electricity.1.

How can a solar system save money?

You can cut the time your solar system takes to pay for itself by finding the best SEG tariff rate, so you get paid more for electricity you produce, and by maximising how much electricity you use (eg. to run appliances) while the sun is up. Find out how much you could earn with the Smart Export Guarantee.
