

Have photovoltaic panels been stolen in the suburbs

Overview

Taylor, presenting at a Solar Crime Open Day event organized by site security company DeterTech and London-based asset manager Schroders, reported a 48% rise in cabling and solar panel theft from solar sites between 2021 and 2022. Speakers at the event, held in Telford, in the west of England, appealed for solar.

Copper hit a record GBP 7,500 per ton in February, according to Richie Iwanoff, head of telecommunications company British Telecom's.

Trade body Solar Energy UK confirms the picture and Taylor and Oakley emphasized the need for site operators to report even trivial incidents to help police build a bigger picture of.

"We know some of the stolen property, stolen panels, are also being sold rather brashly and brazenly on social media," said Taylor. "When you.

The rise of organized crime raids has been accompanied by more opportunistic thefts in the UK, of panels for resale. "The cost-of-living crisis has worsened matters and there has been a big rise.

Are solar panels causing a rise in solar crime?

A rise in solar crime means eco-conscious homeowners and farmers who have diversified into renewables should check their security and insurance. The warning comes after police figures revealed a 48 per cent rise in solar panel and cabling theft from 2021 to 2022.¹.

Are solar panels being stolen in the UK?

That figure - reported by Detective Superintendent James Taylor, head of UK serious organized acquisitive crime unit Opal - included a rise in small-scale thefts of solar panels as rising energy bills and the cost-of-living crisis bite. And the UK experience is far from unique.

How much property was stolen from UK solar sites last year?

Speakers at the event, held in Telford, in the west of England, appealed for

solar site owners to report all incidents of criminal damage, no matter how small. Taylor said GBP 574,300 (\$691,500) worth of property was reported stolen from UK solar sites last year, but noted that the real figure is likely higher.

Did UK police find solar panels stolen from Worcestershire site?

Photo: DeterTech From pv magazine Global 04/23 When the UK police visited an address in Staffordshire they suspected of harboring solar panels stolen from a Worcestershire site in 2019, they not only recovered 13 modules but also found paperwork indicating planned shipments to Madrid for resale.

Can stolen solar panels make money?

With more than 1.4 million solar panels already in domestic properties – a figure that is expected to rise – criminals have realised a lucrative opportunity. Although copper cabling in the stolen panels can make money for thieves, panels are often easier and quicker to steal, and can be easily advertised online and sold on the black market.

Does the UK have a solar crime rate?

And the UK experience is far from unique. German solar security business Viamon tells pv magazine that more than 5,000 “major” solar thefts annually occur in Europe, with more than 400 in Germany alone. In southern Italy, says Viamon Managing Director Oliver Strecke, the solar crime rate is 10 times higher than the European average.
