

Home Solar Photovoltaic Panel Installation

Overview

What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

What is a solar PV system?

power being generated by solar panels or be used in a home. Here are some quick definitions to help you. Solar photovoltaic (PV) systems are made up of several panels. Each panel has many cells made from layers of semi-conducting material, usually silicon.

How are solar panels installed?

Tiles are lifted so that the installers have access to rafters in the roof. Roof hooks are then inserted onto the rafters before the tiles are placed back, leaving the hooks protruding from the roof tiles. Solar panels are installed onto the mounts. Rails are then secured across the roof hooks so that the panels can lay onto them and be fitted.

How do you install PV panels on a house?

The most common method of installing domestic PV panels is mounting them to your rafters. This is done with custom hooks, aluminium mounting frames and specialist clamps. When a property is over one storey high, scaffolding is essential to gain roof access as the engineers need access to work on the roof.
