

Home backup power transfer switch

Overview

What is a transfer switch?

A transfer switch is one of the most vital components of any home-backup generator setup. It allows you to safely connect your generator to your home's electrical system, so you can breeze through power outages with minimal stress.

What is a generator transfer switch?

To begin with, a transfer switch is a permanently-installed device that allows you to safely connect your generator to your home's electrical system. It isolates your generator from the power grid, so that your home is only ever energized by one power source at a time - either the generator or the grid. **WARNING!**

What is a manual transfer switch?

Manual transfer switches require the user to switch the power source from the home circuit to the generator. Set-up is simple, and you can easily find universal transfer switches at the local home improvement store. The only drawback is that someone must be present to switch to the backup power source.

Does a solar generator have a transfer switch?

Both gas and solar generators have automatic transfer switches. However, gas generators usually cause a 1-2 minute service interruption as the generator kicks on and warms up. In contrast, a battery-based home backup solution like the EcoFlow Smart Home Ecosystem allows uninterrupted power.

Where can I find a universal transfer switch?

Set-up is simple, and you can easily find universal transfer switches at the local home improvement store. The only drawback is that someone must be present to switch to the backup power source. It can be inconvenient during a

blackout — especially when it comes to appliances like refrigerators, freezers, and even fish tanks.

Does the home backup kit come in stock?

This is a pre order item. We will ship it when it comes in stock. The Home Backup Kit comprises of two options: a Reliance Controls Pro Tran® 2 Series 30-Amp, 6-Circuit Manual Transfer Switch with a L14-30/L5-30 power inlet, and a 50-Amp, 10-Circuit Manual Transfer Switch with an SS2-5R power inlet, both equipped with wattmeters.

Home backup power transfer switch
