Overview

The 25 GWh tender is widely seen as a turning point for the Chinese storage sector's shift from policy-driven growth to a more sustainable, market-oriented model. With system costs declining rapidly, LFP batteries are gaining traction across grid, generation, and end-user segments.

The 25 GWh tender is widely seen as a turning point for the Chinese storage sector's shift from policy-driven growth to a more sustainable, market-oriented model. With system costs declining rapidly, LFP batteries are gaining traction across grid, generation, and end-user segments.

China Energy Engineering Corporation (CEEC), a state-owned infrastructure giant, has launched one of China's largest energy storage procurements to date, tendering 25 GWh of lithium iron phosphate (LFP) battery systems on 3 June. The bid is being viewed as a watershed moment for the marketization.

June 25, 2025 | Beijing, China — China Energy Engineering Group Co., Ltd. (CEEC), one of the country's leading state-owned energy conglomerates, has officially opened the bidding for its 2025 centralized procurement of lithium iron phosphate (LFP) energy storage systems. With a total scale of.

Wedoany.com Report-Jun 27, On June 3, 2025, China Energy Engineering Corporation (CEEC), a leading state-owned infrastructure company, initiated a significant procurement process for 25 GWh of lithium iron phosphate (LFP) battery systems. This tender represents one of China's largest energy storage.

China Energy Engineering Corporation (CEEC), a state-owned infrastructure giant, has launched one of China's largest energy storage procurements to date, tendering 25 GWh of lithium iron phosphate (LFP) battery systems on 3 June. The bid is being viewed as a watershed moment for the marketization.

As of March 2025, the average price for industrial-scale lithium iron phosphate (LiFePO₄) battery systems has hit ¥0.456 per watt-hour (Wh) in competitive bids [4]—that's cheaper than some bottled water! Three factors are fueling this pricing freefall: Check out these real-world steals: Campers'.

China Energy Engineering Corporation's (CEEC) auction for 25 GWh of lithium-iron-phosphate (LFP) battery systems resulted in a record-low quoted tariff of CNY 0.37/Wh (~\$0.051), a 30% year-over-year decrease from 2024. The tender was structured into three packages based on system duration and.

How big is China's energy storage?

According to the China Energy Storage Alliance (CNESA), new storage installations in China reached 13.3 GW/ 32.1 GWh in the first five months of 2025, up 52.5% / 41.8% year-on-year. The CEEC procurement was split into three packages, totaling 25 GWh and covering systems with durations of one, two, and four hours.

How much does energy storage cost in China?

In what is described as the largest energy storage procurement in China's history, Power Construction Corporation of China (PowerChina) is targeting an unprecedented cumulative storage capacity of 16 GWh. The bids were opened on December 4. The tender attracted 76 bidders, with quoted prices ranging from \$60.5/kWh to \$82/kWh, averaging \$66.3/kWh.

What is the largest energy storage procurement in China's history?

The tender marks the largest energy storage procurement in China's history. In what is described as the largest energy storage procurement in China's history, Power Construction Corporation of China (PowerChina) is targeting an unprecedented cumulative storage capacity of 16 GWh. The bids were opened on December 4.

What does China Energy Engineering Corporation's landmark procurement mean for energy storage?

China Energy Engineering Corporation's landmark procurement signals a shift toward market-driven energy storage, with bids reflecting aggressive cost-cutting and rising industry consolidation.

How will powerchina select a qualified supplier for energy storage system equipment?

According to the previously announced plan by PowerChina, this tender aims to select qualified suppliers for energy storage system equipment for 2025-2026. After the selection, a framework agreement will be signed.

Home energy storage tender price in China 2025

Italian grid company Terna fields 100 GW+ requests ...

A spokesperson for the electricity transmission system operator (TSO) Terna has revealed huge interest in the energy storage-specific Centralized Allocation Mechanism for Energy Sustainability (MACSE) tender ...

PowerChina receives bids for 16 GWh BESS tender with average price ...

The large-scale centralized procurement aims to secure resources for PowerChina's renewable energy projects and align with China's green energy transition goals. Analysts regard this ...

BYD and others were shortlisted for the procurement tender of ...

Polaris Energy Storage Network learned that on April 26, the list of winning candidates for the energy storage system equipment procurement of the China Resources ...

CEEC Unveils Record-Breaking 25 GWh Battery Storage Tender, ...

China Energy Engineering Corporation (CEEC), a major state-owned enterprise, has issued one of the country's largest energy storage procurement tenders to date, targeting ...

"Mind blowing:" Battery cell prices plunge in China's ...

Latest battery storage auction prices in China stun analysts with another big price fall that could fast-track green energy switch and uptake of EVs.

China Energy Engineering Launches Record 25 GWh Storage ...

The China Energy Storage Alliance (CNESA) reported that new energy storage installations in China reached 13.3 GW and 32.1 GWh in the first five months of 2025, reflecting ...

1.6GWh Battery Energy Storage System Tender Launched!

According to Official Account @Storage Discover, according to a report on the website of the Ministry of Commerce of China, to enhance its energy storage capacity, the ...

China Discovers Record Low Tariff of \$0.051/Wh in ...

According to the China Energy Storage Alliance, China added 13.3 GW/32.1 GWh of new energy storage capacity, a YoY increase of 52.5% in power and 41.8% in energy until May 2025. Global energy storage capacity ...
