

Home solar power system is cost-effective

Overview

The average home can save up to £330, saving up to 50% on their electricity bills compared to non-solar households. How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 – £1,500 whereas polycrystalline solar panels cost about £900 per kW.

Why are solar panels so expensive?

Panel efficiency: The more sunlight a solar panel can convert into electricity per sq metre, the more expensive it will be. Panel number: More solar panels means more materials, which means a higher cost. You can limit the number of panels you need by choosing highly efficient ones (although they may cost more).

Do solar panels cost vs long-term benefits?

Dr Ben Kolosz is an Assistant Professor in Renewable Energy and Carbon Removal at the Energy and Environment Institute, University of Hull. We spoke to him about solar panel costs. “Homeowners should consider the cost versus long-term benefits of installing solar panels by evaluating factors like break-even time and potential savings.

Should you consider solar panels as a home improvement?

It's also worth considering solar panels' value as a home improvement. Solar panels are attractive to potential new homeowners when you next sell your home, which can increase your property value as a result.

How much does it cost to install solar panels?

For the average 3.5kWp solar installation, business costs will come to approximately £2,450. The remaining 10-30% of the cost goes towards labour

- the people who will actually fit your panels and the associated kit. This range should cover all domestic installations, including large jobs with more than 20 panels.

Do solar panels increase a home's value?

Solar panels will raise your home's value by 3% on average, adding thousands of pounds to its price tag. A solar panel system typically boosts raise a home's Energy Performance Certificate (EPC) rating by 18 points - a whole grade - according to our calculations, which are based on the government's Standard Assessment Procedure (SAP) guidance.
