

# Hoverboards without lithium batteries

## Overview

---

Do hoverboards use lithium ion batteries?

However, with advancements in battery technology, hoverboards now predominantly use lithium-ion batteries. Lithium-ion batteries are known for their high energy density, lightweight design, and long lifespan.

Can a hoverboard battery be replaced?

Yes, hoverboard batteries can be replaced. Over time, lithium-ion batteries naturally degrade, resulting in reduced capacity and shorter ride times. It's important to choose a replacement battery that is compatible with your hoverboard model. Can I use a 36v battery in a 25.2 V hoverboard?

.

Do hoverboards have acid batteries?

There are a lot of hoverboards on the market which come equipped with acid batteries. They start deteriorating in a matter of days, weeks at best. Our Smart Balance Hoverboards are all equipped with LI-ION Batteries. 2. Battery Capacity and Range Ever wondered how far your hoverboard can take you on a single charge?

.

How long does a hoverboard battery last?

Hoverboard batteries are typically lithium-ion batteries, known for their high energy density and long lifespan. The average hoverboard battery lasts between 45 minutes to 1 hour on a full charge, depending on various factors. Factors that affect hoverboard battery life include rider weight, road conditions, speed, and maintenance.

Can I use a higher voltage battery in a hoverboard?

No, it is not safe to use a higher voltage battery in a hoverboard. Hoverboards are designed to work with specific voltage batteries, and using a higher voltage battery can lead to various issues, including:

Is LiFePO4 a good battery for a hoverboard?

LiFePO4 is a very stable battery technology that arrived in the late 90s. It's made from lithium iron phosphate cells. It has a more constant discharge rate while in use. In other words, as your hoverboard's battery charge percentage lowers, the performance power stays consistent.
