

How about laying solar panels flat on the roof to generate electricity

Overview

Solar panels do work on a flat roof, but the panels need to be at a specific angle to generate the most electricity - around 35 degrees is perfect in the UK. How do flat roof solar panels work?

As with normal solar panels, flat roof solar panels convert sunlight into electricity. You can then use this energy to power your home and its appliances, store the excess in a solar battery to use at a later date or sell it back to the grid through the Smart Export Guarantee (SEG).

Do solar panels need a sloped roof?

Solar panels are more versatile than you think. You don't necessarily need a sloped roof to benefit from solar energy - you can still install some of the best solar panels on a flat roof and generate enough electricity to power your home.

Can you put solar panels on a flat roof?

Not only can you put solar panels on a flat roof, they're actually easier to install than on a sloped roof. This is because solar panel installers have much more room to stand and manoeuvre the panels on a flat roof. Flat roof solar panels can be a great way to use otherwise wasted space, while saving hundreds of pounds a year on your energy bills.

Can solar panels lie flat?

Technically, solar panels can lie flat, but this is not recommended. Laying panels flat reduces their exposure to sunlight, significantly decreasing their efficiency. Flat panels are more prone to dirt and debris accumulation, as rainwater won't naturally wash them clean. Panels laid flat will therefore require regular cleaning.

How much does it cost to install solar panels on a flat roof?

We estimate installing flat roof solar panels for the average 3-bedroom

household in the UK would cost around £10,500, including a battery. Typically, the cost of solar panels on a flat roof is more expensive than on a sloped one due to the added cost of the mounting system.

How do solar panels mount on a flat roof?

There are three types of mounting equipment – brackets, slabs used as ballast and the Bauder system. The Bauder system uses a membrane-to-membrane welding technique that fixes mounting plates onto a flat roof. The solar panel mounts are subsequently slotted into these mounting plates, also eliminating the need to drill directly into the roof
