

How long can the supermarket face scanning locker store

Overview

Which supermarkets have scanned customers' faces?

Tesco, Asda, Morrisons and Co-op have already taken part in trials to test the technology, by scanning the customer's face at the till when they pay for their goods, according to The Telegraph.

Could AI help supermarkets predict the age of shoppers?

Chris Philp, the policing minister, announced on Wednesday that the Government is to consult on new laws that would allow supermarkets to use AI technology capable of accurately estimating the age of shoppers by using a camera to scan their face at the tills.

Which supermarkets are using age estimation technology?

Five major UK supermarkets are set to trial age estimation technology to accurately guess customers' ages when purchasing alcohol. Co-op, Tesco, Asda, Aldi and Morrisons are participating in a Government "regulatory sandbox" between January and May 2022, testing the technology's ability to facilitate alcohol sales safely and swiftly.

Are grocers using facial recognition to look for shoplifters?

Branches of the British grocer Southern Co-op are using surveillance technology to look for potential shoplifters. Branches of Co-op in the south of England have been using real-time facial recognition cameras to scan shoppers entering stores. This story originally appeared on WIRED UK.

Could face scanning replace physical proof of identification?

A government consultation was launched by policing minister Chris Philp on Wednesday which could replace the need for physical proof of identification. Instead, establishments that serve or sell alcohol, such as supermarkets, pubs or bars, could utilise face scanning technology to check if a customer is old enough to purchase the product.

How does facial recognition work in a retail store?

Once installed, facial recognition in retail stores can collect various types of customer data, such as demographics, foot traffic, frequency of visits, and even customer moods. With enough data collected, the system can then begin to do things such as make personalized recommendations for familiar customers on screens set up throughout the store.
