

# How many ohms is the grounding resistance of the photovoltaic panel

## Overview

---

The NFPA and IEEE recommend a ground resistance value of 5 ohms or less while the NEC has stated to “Make sure that system impedance to ground is less than 5 ohms specified in NEC 50.56. What ohm is a good ground resistance?

The telecommunications industry has often used 5 ohms or less as their value for grounding and bonding while electric utilities construct their ground systems so that the resistance at a large station will be no more than a few tenths of one ohm. In general, the lower the ground resistance, the safer the system is considered to be.

How do you calculate ground resistance in ohms?

Use the voltage drop and the injected current to calculate the ground resistance using the Ohm’s law formula:  $R = V / I$  where R is the ground - earth resistance, V is the voltage drop, and I is the injected current. Alternatively, the digital earth resistance tester will show on screen the exact ground resistance in ohms.

How many ohms should a grounding system be?

In facilities with sensitive equipment it should be 5ohms or less. The telecommunications industry has often used 5 ohms or less as their value for grounding and bonding while electric utilities construct their ground systems so that the resistance at a large station will be no more than a few tenths of one ohm.

What is a good ground resistance value?

Is zero ohm a good ground resistance value?

Zero Ohms. Not Really! The goal in ground resistance is to achieve the lowest ground resistance value possible, that makes sense economically and physically, when contacting the earth, also known as the soil/ground rod interface. What Is a Good Ground Resistance Value?

.

What is ground resistance?

Ground resistance is the resistance encountered by an electric current flowing through the ground. It is typically measured in ohms. Here are several methods commonly used to measure ground resistance: The Two-Point Method is basic technique for measuring ground resistance.
