

How much does it cost to buy a large wind turbine

Overview

If you have a high roof that gets enough wind speed on a regular basis then you may well consider installing a roof mounted wind turbine. They vary in power from about 0.5 kW to 2.5 kW and can be used to supplement your electricity supply. Before you take the option of getting a roof mounted turbine you need to.

For those that are serious about using wind as a means of providing renewable energy for a local source and perhaps benefitting from the Feed in Tariff, free-standing wind turbines offer a much more effective option. They are.

Finding the initial outlay for your wind turbine development can often be a problem. There are a number of financial institutions and grants.

If you are a business you may have to pay a levy or tax on the energy such as gas, electricity or coal that you is used in the day to day running of your company. If you install a renewable energy.

One of the attractive things about installing a renewable energy source is the chance it gives you to sell your excess electricity to the power companies.
